

SAFE, COMPLIANT AND MORE EFFECTIVE WORKPLACES

We understand the need to recruit, train and retain the best people in the industry. Our customised training programs are designed around a framework that will assist in providing a safe, risk-free workplace and a more efficient and effective operating team.

Croft Training *checklist*

- Your own customised training portal for workplace compliance, continuous operational improvement & education.
- Make the onboarding of new staff compliant, professional and ensure they are educated about products, safety and use.
- Reduce risk by making sure all staff are using products safely, effectively, and efficiently
- Monitor your employee's progression, pass rate, completion and issued a certificate for you records.
- Training needs analysis conducted and a competency framework created incorporating chemical and cleaning requirements.
- Identify competency issues within your teams

Monitor your employee's progression, pass rate, completion and issue certificates for your records. Make the onboarding of new staff compliant, professional, seamless and rest easy knowing they are using all products safely, effectively, and efficiently.

"Croft Training platform has been a great tool for our staff.

The chemical training provided is comprehensive and tailored specifically to suit our business needs.

Receiving a personalised Certificate of Completion is also beneficial, enabling us to track who has finished the course and being able to store these on file for auditing purposes.

We are thankful for this program which saves our directors time, while ensuring that staff receive the training they require."

Our Training Framework

Our personalised training programs are designed around a framework that will assist in providing a safe, risk-free workplace and a more efficient and effective operating team.

Training needs

We will conduct a training needs analysis that will identify the scope i.e. who requires training, required topics, methods of delivery.

Define competencies

Design a customised range of competencies that meet the teams and business training requirements.

Design content

Our team of experts will create modularised / vignette style content based on competency framework defined.

Deliver training

Training modules to be delivered through a variety of mediums such as online, F2F, video, zoom, hand-outs through a private & personalised Learning Management System.

Continuous improvement

Review and amend training modules based on industry / product changes and team feedback.
