

# FINGERS COUNT

"A gust of wind, a thoughtless moment, a playtime prank, whatever the cause, in Victoria alone statistics show on average there are more than 500 hospital admissions every year for serious hand and finger injuries caused by doors. Over half of those admitted are under the age of 9 with almost 50% suffering fractures or traumatic amputation."

Source: MONASH University Accident Research Centre

Simple low cost Door Finger Protection System that can be fitted to ALL doors

## How serious is the risk?

**32,000lb of pressure**

The guillotine effect of a closing door can horribly mutilate fingers, causing permanent damage, even amputation.

**2000 accidents a year**

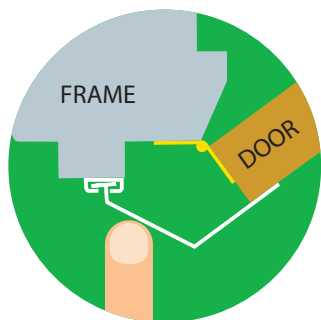

Monash University statistics on the number of door related accidents requiring hospital treatment, with over half of those aged 9 or under.

**You can stop it happening**

Backed by our 10 year warranty. Once fitted, Door Finger Protector® will give many years of safety protection and maintenance-free service.

# Decide now to fit Door Finger Protector® and you'll never have to deal with the trauma of crushed fingers

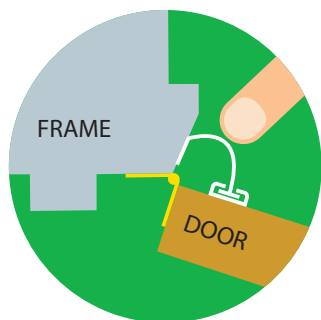

## Door Finger Protector

Protection against fingers entering the dangerous gap along the hinged side of doors.

Durable and effective, the unique design means it cannot be imploded so eliminates the risk of injury. The installation causes no damage to door or frame and no compromise of fire door integrity. However, if required (i.e. due to poor surface condition) additional screw fixings can and will be used.

Available in White & Grey – Choose the size to suit your door

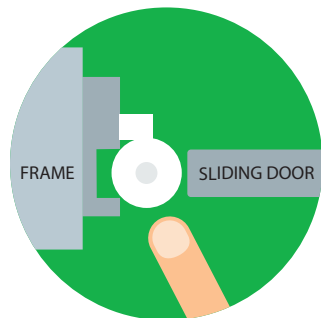

## Door Hinge Protector

Guarantee all-round door safety by installing the Door Finger Protector – Hinge Pin device. This door hinge guard covers the gap that is created on the hinge pin side of a door, when the door is in the open position.

Used in conjunction with Door Finger Protector™ the risk of finger entrapment accidents on the hinged edge of doors is totally eliminated.

Available in White & Grey – Standard height of 1985mm

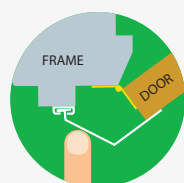

## Slide Safe - Sliding Door Protector

SlideSafe™ creates a safe gap between the door's leading edge and the closing jam.

Installed at a height out of reach of small children, the device can be manually cancelled by a responsible adult at any time by engaging the red-capped hold-back pin. Disengaging the pin will reactivate the device.

Available in White

### Door Finger Protector Measuring Chart

HC = STANDARD UNIT  
HCL = LARGE UNIT

Door Thickness	Maximum door opening angle		
	90°	130°	170°
33mm	HC	HC	HC
45mm	HC	HC	HCL
60mm	HC	HCL	HCL

For door thicknesses larger than 60mm please contact the team for larger variations and Door Finger Protector options
